“Lifetime of Wellness” recommendation*

Your Kitten's Lifetime of Wellness

Congratulations on this wonderful addition to your family!

In order to ensure that your new kitten has a long, healthy, productive life, we recommend the following health maintenance schedule:

6 to 8 Weeks Old

- Initial Wellness Examination and Discussion
- Feline Leukemia Virus / Feline Immunodeficiency Virus testing
- First Distemper Combination Vaccination- *Panleukopenia (Distemper), Calicivirus, and Viral Rhinotracheitis*
- Intestinal Parasite Examination (*fecal sample*)
- Feed a premium Kitten/Growth Diet
- Start Flea-Tick Preventative (*once a month all year round*)
- Schedule Spay or Neuter surgery (*4-6 months of age*)

9 to 11 Weeks Old

- Second Distemper Combination Vaccination
- First Feline Leukemia Vaccination
- Microchip Pet Identification
- Continue Flea-Tick Preventative (*once a month all year round*)

12 to 14 Weeks Old

- Third Distemper Combination Vaccination
- Second Feline Leukemia Vaccination
- Continue Flea-Tick Preventative (*once a month all year round*)

15 to 17 Weeks Old

- Rabies One Year Vaccination, *Rabies Certificate*

4 to 6 Months Old

- Spay or Neuter Surgery
- After surgery, switch to a premium Adult or Light Diet

Annually (1-6 years of age)

- Comprehensive Wellness Examination & Dental Health Evaluation
- Distemper Combination Vaccination Booster- (*every year*)
- Feline Leukemia Vaccination- *every year (if cat has a risk of exposure: outdoor cat)*
- Rabies Vaccination Booster- *every year*
